

Attention DME Providers: Coverage of Compression Garments and Related Items

Louisiana Medicaid is updating the DMEPOS fee schedule effective May 1, 2014 to include coverage of the full range of procedure codes for custom ordered/fitted compression garments (e.g., stocking/burn garment/gradient pressure aid garment/sleeve) and the necessary pneumatic compressors and appliances. The HCPCS code range currently includes A6501-A6538, S8420- S8427, and E0650-E0675.

There are no established fees for most of the items; therefore when necessary, the reimbursement rates will be manually priced in the usual manner. Because most of the procedure codes represent items that are custom made, the following manual pricing methodology is to be used: where there is a manufacturer's suggested retail price (MSRP), the reimbursement will be MSRP minus (-) 23.7%. If there is no MSRP, the reimbursement shall be the documented provider invoice fee plus (+) 6.3%.
