**CHAPTER 16: DENTAL SERVICES** 

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

## EARLY AND PERIODIC SCREENING, DIAGNOSIS AND TREATMENT – COVERED SERVICES

Dental services covered under the Early and Periodic Screening, Diagnosis and Treatment (EPSDT) Dental Program are divided into the following eleven categories:

- Diagnostic;
- Preventive:
- Restorative:
- Endodontic;
- Periodontal;
- Removable Prosthodontics;
- Maxillofacial Prosthetics;
- Fixed Prosthodontics;
- Oral and Maxillofacial Surgery;
- Orthodontic; and
- Adjunctive General Services.

**NOTE:** Services that require prior authorization (PA) are identified by an asterisk {\*}.

## **Initial Dental Screening and Annual Recall Visits**

The dental visit, which includes the initial dental screening visit (Comprehensive Oral Examination) and annual recall visit (Periodic Oral Examination), must include (but is not limited to) the following diagnostic and preventative services, when appropriate:

- Examination of the oral cavity and all of its structures, using a mirror and explorer, periodontal probe (if required) and necessary diagnostic or vitality tests (considered part of the examination);
- Bitewing radiographic images;
- Prophylaxis, including oral hygiene instructions; and,
- Topical fluoride varnish (beneficiaries under six years of age) or topical application of fluoride (beneficiaries under 16 years of age).

The visit should also include preparation and/or updating the beneficiary's treatment record, development of a current treatment plan, and the completion of reporting forms.

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

The initial comprehensive oral examination (D0150) or the periodic oral examination (D0120), prophylaxis (D1110 or D1120), and topical fluoride varnish (D1206) or topical application of fluoride (D1208) are limited to once per six-month period. In cases where the provider considers radiographic images, prophylaxis or fluoride to be medically contraindicated, a narrative stating the contraindication must be documented in the beneficiary's treatment record.

The provider must ask a new patient when he/she last received a Medicaid-covered oral examination, prophylaxis, bitewing radiograph, and fluoride and record that information in the beneficiary's treatment record. A new patient is described as a beneficiary that has not received active treatment from the provider for at least three years. For an established patient, the provider must check the beneficiary's treatment record to ensure that it has been at least six months since the beneficiary received these services. If it is determined that it has been less than six months, the beneficiary must schedule for a later date. An established patient is one who has received active treatment from the provider within the past three years. The dental provider should maintain a recall system of beneficiaries for future examinations and treatment, if required.

For all (new and established) beneficiaries, dental providers must utilize the electronic Clinical Data Inquiry (e-CDI) application which is available in the provider restricted area of the Louisiana Medicaid website (see Appendix J) in order to determine whether each beneficiary has received a Medicaid-reimbursed oral examination, bitewing radiographic images, prophylaxis, and fluoride within the preceding six-month period. Providers must select the option for "Ancillary Services" in order to review the beneficiary's dental claims history. The e-CDI application provides up to 12 months of history information. A printout of the dental claims history from the e-CDI application must be placed in the beneficiary's treatment record prior to each initial or recall visit.

## **Diagnostic Services**

Diagnostic services include examinations, radiographic images and oral/facial images, diagnostic casts, and accession of tissue - gross and microscopic examination.

#### **Codes**

D0120	Periodic Oral Examination (established patient)
D0145	Oral Examination for a Patient under Three Years of Age and Counseling with
	Primary Caregiver
D0150	Comprehensive Oral Examination (new or established patient)
D0210	Intraoral - complete series of radiographic images
D0220	Intraoral – periapical first radiographic image
D0230	Intraoral – periapical each additional radiographic image
D0240	Intraoral – occlusal radiographic image
D0272	Bitewings – two radiographic images

## LOUISIANA MEDICAID PROGRAM

ISSUED: 07/01/20 REPLACED: 02/27/19

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

D0330	Panoramic radiographic image
D0350	Oral/Facial Images
<b>D0470</b>	Diagnostic Casts
D0473	Accession of tissue, gross and microscopic examination, preparation and transmission of written report
D0474	Accession of tissue, gross and microscopic examination, including assessment of surgical margins for presence of disease, preparation and transmission of written report

#### **Examinations**

The following are the descriptive codes and guidelines for dental examinations.

#### **Codes**

<b>D0120</b>	Periodic Oral Examination (established patient)
D0145	Oral Examination for a Patient under Three Years of Age and Counseling with
	Primary Caregiver
D0150	Comprehensive Oral Examination (new or established patient)

The following EPSDT Dental Program Services are limited to once per six-month period (with noted exception) per beneficiary, as is age appropriate:

- D0145 (Oral Examination for a Patient under Three Years of Age and Counseling with Primary Caregiver; or
- D0120 (Periodic Oral Examination established patient) 3 through 20 years of age).

Procedure code D0150 remains the appropriate procedure code for new patients who are 3 through 20 years of age. D0150 is reimbursable once in a three-year period when performed by the same or another Medicaid rendering general dentist located in the same office as the billing provider. However, a recognized dental specialist within the same office (group) may perform a D0150 prior to the expiration of the three-year period.

In addition, the appropriate recall visit (D0120 or D0145) must be scheduled at least six months after the initial visit (D0150) is rendered.

Section 16.5

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

#### **D0120** Periodic Oral Examination (established patient)

An examination performed on an established patient to determine any changes in the beneficiary's dental and medical health status since a previous comprehensive or periodic examination.

This procedure is limited to once per six-month period and is reimbursable for beneficiaries age three through age 20.

The periodic oral examination must include (but is not limited to) examination of the oral cavity and all of its structures, using a mirror and explorer, periodontal probe (if required), and necessary diagnostic or vitality tests (considered part of the examination).

## D0145 Oral Examination for a Patient under Three Years of Age and Counseling with Primary Caregiver

Diagnostic and preventive services performed for a beneficiary under the age of three, preferably within the first six months of the eruption of the first primary tooth, including recording the oral and physical health history, evaluation of caries susceptibility, development of an appropriate preventive oral health regimen, and communication with and counseling of the beneficiary's parent, legal guardian, and/or primary caregiver.

This procedure may be reimbursed once per six-month period except when performed by a Medicaid-recognized dental specialist.

Procedure codes D0120 and D0150 are NOT reimbursable if procedure code D0145 has been reimbursed to any provider, excluding a Medicaid-recognized dental specialist, within the prior six-month period for the same beneficiary.

#### **D0150** Comprehensive Oral Examination (new or established patient)

Procedure code D0150 is to be used for a comprehensive evaluation performed on a beneficiary age three through 20 years of age by a Medicaid-recognized dentist and/or dental specialist. This would include the examination and recording of the beneficiary's dental and medical history and a general health assessment.

The comprehensive oral examination must include (but is not limited to) examination of the oral cavity and all of its structures, using a mirror and explorer, periodontal probe (if required), and necessary diagnostic or vitality tests (considered part of the examination).

After the comprehensive oral examination, subsequent visits should be scheduled by the provider to correct the dental defects that were identified. If no subsequent visit is required, the bitewing

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

radiographic images, prophylaxis, and fluoride must be provided at the time of the initial comprehensive or periodic oral examination. If subsequent treatment is required, these services must be provided at the first treatment visit if they were not provided at the initial comprehensive periodic oral examination.

The dental provider should maintain a recall of beneficiaries for future examinations and treatment, if required.

Procedure code D0150 is reimbursable once per three years when performed by the same or another Medicaid general dentist located in the same office (group) as the billing provider. However, a Medicaid-recognized dental specialist within the same office (group) may perform a D0150 prior to the expiration of the three-year period.

Beneficiaries are allowed only one examination per six-month period except when the subsequent examination is performed by a Medicaid-recognized dental specialist.

## **Radiographic Images**

#### **Codes**

<b>D0210</b>	Intraoral – complete series of radiographic images
<b>D0220</b>	Intraoral – periapical first radiographic image
D0230	Intraoral – periapical each additional radiographic image
D0240	Intraoral – occlusal radiographic image
D0272	Bitewings – two radiographic images
D0330	Panoramic radiographic image
D0350	Oral / Facial Images

Radiographic images and/or oral/facial images must be of **good diagnostic quality**. Radiographic mounts and panographic-type radiographic images should indicate the date taken, the name of the beneficiary, and the provider. Radiographic copies should indicate the same information as well as be marked to indicate the left and right sides of the beneficiary's mouth.

Scanned radiographic images should be of an adequate resolution to be diagnostically acceptable and must indicate the right and left sides of the beneficiary's mouth. Scanned images that are not diagnostically acceptable will be returned for new images.

According to the accepted standards of dental practice, the provider should limit the number of images obtained to the minimum necessary to obtain essential diagnostic information.

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

In cases where the provider considers radiographic images to be medically contraindicated, a narrative stating the contraindication must be documented both in the beneficiary's treatment record and on the claim form submitted.

A protective apron and thyroid shield must be used when taking any radiographic images reimbursed by the Medicaid Program. When taking radiographic images, the use of a protective apron and thyroid shield collar is generally accepted standard of care practice, and is part of normal, routine, radiographic hygiene.

Any periapical radiographic images, occlusal radiographic images, complete series, or panoramic radiographic images taken annually or routinely at the time of a dental examination appointment for screening purposes are not covered. If a routine practice of taking such radiographic images, without adequate diagnostic justification, is discovered during post payment review, all treatment records may be reviewed and recoupment of payments for all radiographic images will be initiated.

#### D0210 Intraoral- complete series of radiographic images

In order to be reimbursed, a complete series must consist of the following numbers and types of films:

- Two cavity-detecting (bitewing) radiographic images, and six periapical radiographic images, for beneficiaries six years of age or younger.
- Two cavity-detecting (bitewing) radiographic images, and 10 periapical radiographic images, for beneficiaries age seven through age 13.
- Two cavity-detecting (bitewing) radiographic images, and 14 periapical radiographic images, for beneficiaries 14 years of age or older.

A complete series must be justified in the treatment records by the findings of a clinical examination. Complete series or panoramic radiographic images should not be used for diagnostic purposes when a lesser number of periapical radiographic images would provide the necessary diagnostic information.

This procedure is reimbursable only once per 12-month period, except when performed by a Medicaid-recognized dental specialist.

If a complete series of radiographic images (D0210) is billed within 12 months of bitewing radiographic images (D0272), the fee for the complete series of radiographic images (D0210) will be cutback by the amount of the fee for the bitewing radiographic images (D0272). If bitewing

Section 16.5

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

radiographic images (D0272) are billed within 12 months of the complete series of radiographic images (D0210), the bitewing radiographic images (D0272) will be cutback to \$0.

D0220 Intraoral – periapical first radiographic image

D0230 Intraoral – periapical each additional radiographic image

Payment for periapical radiographic images (D0220 and D0230) taken in addition to bitewing radiographic images (D0272) is limited to a total of five and is payable when the purpose is to obtain information in regard to a specific pathological condition other than caries (ex. periapical pathology or serious doubt regarding the presence of the permanent dentition).

Under the following circumstances, periapical radiographic images must be taken or written documentation as to why the radiograph(s) was contraindicated must be noted in the beneficiary's treatment record:

- An anterior crown or crown buildup is anticipated; or
- Posterior endodontic therapy is anticipated (root canal working and final fill films are included in the fees for endodontic treatment); or
- Anterior **initial** or **retreatment** endodontic therapy is anticipated (both maxillary and mandibular anterior films) (root canal working and final fill films are included in the fees for endodontic treatment); or
- Prior to any tooth extraction.

These radiographic images are reimbursable for, and must be associated with, a specific unextracted Tooth Number 1 through 32 or Letter A through T. The appropriate tooth number or letter must be identified in the "Tooth Number(s) or Letter(s)" column of the American Dental Association (ADA) Dental Claim Form when requesting reimbursement for this procedure.

#### D0240 Intraoral – Occlusal radiographic image

A #2 size film taken in an occlusal orientation will be considered an anterior periapical radiograph for payment. The fee for an occlusal radiograph will be paid only when a true occlusal film (2" x 3") is used to evaluate the maxillary or mandibular arch. This radiograph is reimbursable for Oral Cavity Designation areas 01 and 02. The appropriate oral cavity designator must be identified in the "Area of Oral Cavity" column of the ADA Dental Claim Form when requesting reimbursement for this procedure.

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

#### D0272 Bitewings – two radiographic images

Bitewing radiographic images (D0272) are required at the comprehensive oral examination and annually at the periodic oral examination. These radiographic images are limited to one set per year when performed by the same billing provider, except when performed by a Medicaid-recognized dental specialist. If radiographic images cannot be obtained, a narrative explaining the reason why they could not be taken must be documented both in the beneficiary's treatment record, as well as in the remarks section of the claim form submitted.

## D0330 Panoramic radiographic images

This procedure code is reimbursable only once per day by any provider, facility or group and is limited to one service every 12-months by the same provider. Rationale is required for members less than 3 years of age.

Panoramic radiographic images (D0330) are not reimbursable separately when a comprehensive orthodontic or crossbite therapy workup is performed.

Panoramic radiographic images (D0330) are not allowed on emergency claims unless third molars or a traumatic condition is involved. Rationale for use is needed when panoramic images are warranted during palliative care.

#### D0350 Oral/Facial Images

Oral/facial images (D0350) means photographic images, including those obtained by intraoral and extraoral cameras, excluding radiographic images. These photographic images must be a part of the beneficiary's treatment record. Oral/facial images are required when dental radiographic images do not adequately indicate the necessity for the requested treatment in the following situations:

- Prior to gingivectomy;
- Prior to frenulectomy; or
- With the presence of a fistula prior to retreatment of previous endodontic therapy, anterior.

The provider should bill Medicaid for oral/facial images ONLY when the photographs are taken under these circumstances. If post payment review discovers the billing of oral/facial images not in conjunction with these specific services, recoupment will be initiated.

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

Oral/facial images must be of good diagnostic quality and must indicate the necessity for the requested treatment.

This procedure is limited to two units per same date of service.

Procedure code D0350 is reimbursable for Oral Cavity Designation areas 01, 02, 10, 20, 30, and 40.

#### **Other Diagnostic Services**

#### **Codes**

D0470 D0473	Diagnostic Casts Accession of tissue, gross and microscopic examination, preparation and transmission of written report
D0474	Accession of tissue, gross and microscopic examination, including assessment of surgical margins for presence of disease, preparation and transmission of written report
D0470 D0473	Diagnostic Casts Accession of tissue, gross and microscopic examination, preparation and transmission of written report

Oral pathologists and medical pathologists may be reimbursed for histopathologic study and interpretation of oral specimens. The attending dental provider may not bill procedure code D0473 on the pathologist's behalf.

For information on the surgical procedure to obtain the specimen for biopsy, please refer to the section on ORAL SURGERY SERVICES, codes D7285 and D7286.

# D0474 Accession of tissue, gross and microscopic examination, including assessment of surgical margins for presence of disease, preparation and transmission of written report

Oral pathologists and medical pathologists may be reimbursed for histopathologic study and interpretation of oral specimens. The attending dental provider may not bill procedure code D0474 on the pathologist's behalf.

For information on the surgical procedure to obtain the specimen for biopsy, please refer to the section on ORAL SURGERY SERVICES, codes D7285 and D7286.

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

#### **Preventive Services**

Preventive services include prophylaxis, topical fluoride treatments, sealants, fixed space maintainers, and recementation of space maintainer.

#### Codes

D1110	Adult Prophylaxis
D1120	Child Prophylaxis
D1206	Topical Fluoride Varnish; Therapeutic application for Moderate to High Caries
	Risk Patients
D1208	Topical Application of Fluoride – excluding varnish
D1351	Sealants
D1510	Unilateral Space Maintainer
D1516	Bilateral Space Maintainer – fixed, maxillary
D1517	Bilateral Space Maintainer – fixed, mandibular
D1551	Recementation of space maintainer-maxillary
D1552	Recementation of space maintainer-mandibular
D1553	Recementation or re-bound unilateral space maintainer – per quadrant
D1556	Removal of fixed unilateral space maintainer
D1557	Removal of fixed bilateral space maintainer-maxillary
D1558	Removal of fixed bilateral space maintainer- mandibular
D1575	Distal shoe space maintainer – fixed, unilateral per quadrant

## **Prophylaxis**

## **D1110 Adult Prophylaxis**

Prophylaxis for beneficiary's age 12 through 20 years of age includes removal of plaque, calculus, and stains from the tooth structures in the permanent and transitional dentition. It is intended to control local irritational factors. Qualified dental personnel must perform any prophylaxis.

This procedure is limited to once per six-month period.

Procedure code D4355 (Full Mouth Debridement) is not reimbursable if procedure code D1110 (Adult Prophylaxis) has been reimbursed within the prior twelve-month period for the same beneficiary.

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

#### **D1120 Child Prophylaxis**

Prophylaxis for beneficiaries under 12 years of age includes removal of plaque, calculus, and stains from the tooth structures in the primary and transitional dentition. It is intended to control local irritational factors. Qualified dental personnel must perform any prophylaxis.

This procedure is limited to once per six-month period.

Procedure code D4355 (Full Mouth Debridement) is not reimbursable if procedure code D1120 (Child Prophylaxis) has been reimbursed within the prior twelve-month period for the same beneficiary.

#### Fluoride Treatment

## D1206 Topical Fluoride Varnish; Therapeutic Application for Moderate to High Caries Risk Patients

Application of topical fluoride varnish, delivered in a single visit and involving the entire oral cavity. Not to be used for desensitization. Procedure code D1206 is reimbursable for beneficiaries under six years of age only.

Procedure code D1206 is reimbursable once per six-month period, for the same beneficiary.

In addition, reimbursement of fluoride treatment for beneficiaries under six years of age is limited to either of the following within a six-month period, per beneficiary:

- D1206 (Topical Fluoride Varnish); or
- D1208 (Topical Application of Fluoride).

**NOTE:** A combination of D1208 and D1206 are NOT reimbursable in the same six-month period.

#### D1208 Topical Application of Fluoride – excluding varnish

Prescription strength fluoride product designed solely for use in the dental office, delivered to the dentition under the direct supervision of a dental professional. Fluoride must be applied separately from prophylaxis paste.

Procedure code D1208 is reimbursable for beneficiaries under 16 years of age. This procedure is limited to once per six-month period.

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

#### **Sealants**

## D1351 Sealants – per tooth

A sealant is a mechanically and/or chemically prepared enamel surface seal applied to the occlusal surface to prevent decay. Sealants are limited to six and 12-year molars only. Sealants are further limited to one application per tooth per 24 months.

Six-year molar sealants are reimbursable for beneficiaries under 10 years of age only. Twelve-year molar sealants are reimbursable for beneficiaries under 16 years of age only.

All sealants must be performed on a single date of service, unless restorations or other treatment services are necessary. If restorative or other treatment services are necessary, sealants may be performed on the same date of service as the restorative or other treatment services. If there are circumstances that would not allow sealants to be applied in this manner, the contraindication(s) must be documented in the beneficiary's treatment record.

This procedure is reimbursable for Tooth Numbers 2, 3, 14, 15, 18, 19, 30 and 31 only.

In order for a tooth to be reimbursable for sealant services, it must be caries-free on the date of service. Sealants are not reimbursable for teeth that have any previous occlusal restoration. Dental sealants may be applied only by persons licensed to do so under the Dental Practice Act of the State of Louisiana.

## **Space Maintenance**

D1510	Space maintainer – fixed – unilateral – per quadrant
D1516	Space maintainer – fixed – bilateral, maxillary
D1517	Space maintainer – fixed – bilateral, mandibular
D1551	Recementation of space maintainer-maxillary
D1552	Recementation of space maintainer-mandibular
D1553	Recementation or re-bound unilateral space maintainer – per quadrant
D1556	Removal of fixed unilateral space maintainer – per quadrant
D1557	Removal of fixed bilateral space maintainer maxillary
D1558	Removal of fixed bilateral space maintainer mandibular
D1575	Distal shoe space maintainer – fixed unilateral per quadrant

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

Fixed-space maintainers are limited to the necessary maintenance of a posterior space for a permanent successor to a prematurely lost deciduous tooth (teeth). Removable, maxillary anterior or active space maintainers are not covered.

Procedure codes D1510 (Space maintainer – fixed – unilateral – per quadrant) and D1575 (Distal shoe space maintainer – fixed – unilateral – per quadrant) are reimbursable for Oral Cavity areas 10, 20, 30, and 40. Procedure code D1516 (Space maintainer – fixed – bilateral, maxillary) is reimbursable for Oral Cavity area 01 and procedure code D1517 (Space maintainer – fixed – bilateral, mandibular is reimbursable for Oral Cavity area 02.

The beneficiary's treatment records must indicate the tooth/teeth that have been or will be extracted in Block 34 of the ADA Dental Claim Form ("X" for missing teeth and "/" for teeth to be extracted).

#### D1551 Recementation of space maintainer-maxillary

The billing provider is responsible for replacement and recementation within the first 12 months after placement of the space maintainer. This procedure is limited to one recementation per appliance, in a five-year period.

#### D1552 Recementation of space maintainer-mandibular

The billing provider is responsible for replacement and recementation within the first 12 months after placement of the space maintainer. This procedure is limited to one recementation per appliance, in a five-year period.

#### D1553 Recement or rebound unilateral space maintainer –per quadrant

The billing provider is responsible for replacement and recementation within the first 12 months after placement of the space maintainer. This procedure is limited to one recementation per appliance, in a five-year period.

This procedure is reimbursable for Oral Cavity Designators 10, 20, 30, and 40.**D1556**Removal of fixed unilateral space maintainer –per quadrant

This procedure code is reimbursable for the removal of Space maintainer - fixed - unilaterally (D1510 & D1575).

This procedure is NOT reimbursable to the same billing provider who placed the appliance or another Medicaid provider located in the same office (group) as the billing provider who placed the appliance.

## **CHAPTER 16: DENTAL SERVICES**

**SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55** 

This procedure is reimbursable for Oral Cavity Designation areas 10, 20, 30, and 40.

#### D1557 Removal of fixed bilateral space maintainer-maxillary

This procedure code is reimbursable for the removal of a Space maintainer - fixed - bilaterally (D1516 or deleted code D1515 (01).

This procedure is NOT reimbursable to the same billing provider who placed the appliance or another Medicaid provider located in the same office (group) as the billing provider who placed the appliance.

#### D1558 Removal of fixed bilateral space maintainer- mandibular

This procedure code is reimbursable for the removal of a Space maintainer - fixed - bilaterally (D1517 or deleted code D1515 (02).

This procedure is NOT reimbursable to the same billing provider who placed the appliance or another Medicaid provider located in the same office (group) as the billing provider who placed the appliance.

#### D1575 Distal shoe space maintainer – fixed – unilateral – per quadrant

This procedure code is reimbursable for placement of a distal shoe space maintainer which extending subgingivally and distally to guide the eruption of the first permanent molar. The provider is responsible for replacement and recementation within the first 12 months of initial placement. However, this service does not include ongoing follow-up, adjustments, or replacement appliance once the permanent tooth has erupted. It is limited to fixed appliances. A space maintainer will not be reimbursed if the space will be maintained for less than six (6) months.

This procedure is reimbursable for Oral Cavity Designation areas 10, 20, 30, and 40.

Section 16.5

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

## **Restorative Services**

## Codes

<b>D2140</b>	Amalgam – one surface, primary or permanent
D2150	Amalgam – two surfaces, primary or permanent
<b>D2160</b>	Amalgam – three surfaces, primary or permanent
D2161	Amalgam – four or more surfaces, permanent
D2330	Resin-based composite, one surface, anterior
D2331	Resin-based composite, two surfaces, anterior
D2332	Resin-based composite, three surfaces, anterior
D2335	Resin-based composite – four or more surfaces or involving incisal angle
	(anterior)
D2390	Resin-based composite crown, anterior
D2391	Resin-based composite, one surface, posterior
D2392	Resin-based composite, two surfaces, posterior
D2393	Resin-based composite, three surfaces, posterior
D2394	Resin-based composite, four or more surfaces, posterior
D2920	Re-cement crown
D2930	Prefabricated Stainless Steel Crown – primary tooth
D2931	Prefabricated Stainless Steel Crown – permanent tooth
D2932	Prefabricated Resin Crown (primary and permanent teeth)
D2933	Prefabricated stainless steel crown with resin window
D2934	Prefabricated esthetic coated stainless steel crown primary
D2950	Core Buildup, including any pins, in addition to crown
D2951	Pin retention – per tooth, in addition to restoration
D2954	Prefabricated post in addition to crown
D2999*	Unspecified Restorative Procedure, by report

Local anesthesia is considered part of restorative services. Tooth and soft tissue preparation, all adhesives (including amalgam bonding agents), liners and bases, are included as part of amalgam restorations. Tooth and soft tissue preparation, all adhesives (including resin bonding agents), liners and bases, and curing are included as part of resin-based composite restorations. Pins must be reported separately.

The surfaces that may be billed as restored can be any one or combination of five of the seven recognized tooth surfaces: mesial, distal, occlusal, incisal, lingual, facial, or buccal.

The original billing provider is responsible for the replacement of the original restoration within the first 12 months after initial placement.

## LOUISIANA MEDICAID PROGRAM

ISSUED: 07/01/20 REPLACED: 02/27/19

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

No restoration of any type will be reimbursable for deciduous central or lateral incisor teeth (Tooth letters D, E, F, G, N, O, P, and Q) for beneficiaries who have reached their **fifth** birthday.

Laboratory processed crowns are not covered.

If the tooth is decayed extensively, consideration should be given for the provision of an amalgam, four or more surfaces, permanent (D2161); resin-based composite, four or more surfaces, posterior (D2394); resin-based composite, four or more surfaces or involving incisal angle, anterior (D2335); a resin-based composite crown, anterior (D2390); or a prefabricated stainless steel crown (D2930, D2931, D2932, D2933 or D2934).

Unless contraindicated, all restorative and treatment services per quadrant must be performed on the same date of service. This allows the dentist to complete all restorative treatment in the area of the mouth that is anesthetized. In addition, if there is a simple restoration required in a second quadrant, the simple restorative procedure in the second quadrant must also be performed at the same appointment. If there are circumstances that would not allow restorative treatment in this manner, the contraindication(s) must be documented in the beneficiary's treatment record.

## **Amalgam Restorations (including polishing)**

#### **Codes**

D2140	Amalgam – one surface posterior, primary or permanent
D2150	Amalgam – two surfaces posterior, primary or permanent
<b>D2160</b>	Amalgam – three surfaces posterior, primary or permanent
D2161	Amalgam – four or more surfaces posterior, permanent

Procedure codes D2140, D2150, D2160, and D2161 represent final restorations. Procedure code D2161 is not reimbursable for primary teeth.

Duplicate surfaces are not reimbursable on the same tooth, in amalgam restorations, within a 12-month period by any provider.

If two or more restorations are placed on the same tooth, a maximum amalgam fee that can be reimbursed per tooth has been established such that all restored surfaces on a single tooth shall be considered connected.

The fee for any additional restorative service(s) on the same tooth will be cut back to the maximum fee for the combined number of non-duplicated surfaces when performed within a 12-month period. In these situations, the maximum combined fee for the two or more restorations within a 12-month period on the same tooth will not exceed the maximum fee of the larger restoration. In

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

addition, Medicaid policy allows reimbursement for certain second or subsequent restorations on permanent teeth at the full Medicaid reimbursement fee for the same tooth when billed within 12 months from the date of the original restoration when the need for the restoration is due to pulpal necrosis (root canal), traumatic injury to the tooth, or in the event of failed restoration which must be indicated in the beneficiary's treatment records (see Appendix F).

Providers must utilize the e-CDI application to determine whether the beneficiary has received a restoration within the preceding 12-month period from the date of original restoration.

Amalgam restorations must be placed in a preparation in which the entire preparation extends through the enamel and into dentin. The restoration must follow established dental protocol in which the preparation and restoration should include all grooves and fissures on the billed surface(s). For providers to bill for a complex occlusal buccal or occlusal lingual restoration, the preparation must extend the full length of the buccal or lingual groove or fully restore the buccal or lingual pit in addition to the occlusal surface. If the restoration is a mesial occlusal or distal occlusal restoration, the preparation must extend down the mesial or distal surface far enough for the restoration to be in a cleanable, inspectable area.

Procedure codes D2140, D2150, and D2160 are reimbursable for Tooth Numbers 1 through 32 and Letters A through T. Please note, for beneficiaries under five years of age, restorations are reimbursable for Tooth Letters D, E, F, G, N, O, P, and Q only.

Procedure code D2161 is reimbursable for Tooth Numbers 1 through 32 only.

## **Resin-Based Composite Restorations - Direct**

#### **Codes**

D2330	Resin-based composite, one surface, anterior
D2331	Resin-based composite, two surfaces, anterior
D2332	Resin-based composite, three surfaces, anterior
D2335	Resin-based composite – four or more surfaces or involving incisal angle, anterior
D2390	Resin-based composite crown, anterior
D2391	Resin-based composite, one surface, posterior
D2392	Resin-based composite, two surfaces, posterior
D2393	Resin-based composite, three surfaces, posterior
D2394	Resin-based composite, four or more surfaces, posterior

Procedure codes D2330, D2331, D2332, D2335, D2390, D2391, D2392, D2393, and D2394 represent final restorations. If two restorations are placed on the same tooth, a maximum fee for

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

resin-based composites that can be reimbursed per tooth has been established. The fee for any additional restorative service(s) on the same tooth will be cut back to the maximum fee for the combined number of surfaces when performed within a 12-month period, by any provider.

Procedure code D2335 or D2394 is reimbursable only once per day for the same tooth when performed by any billing provider.

In these situations, the maximum combined fee for the two or more restorations within a 12-month period on the same tooth will not exceed the maximum fee of the larger restoration. In addition, Medicaid policy allows reimbursement for certain second or subsequent restorations on permanent teeth at the full Medicaid reimbursement fee for the same tooth when billed within 12 months from the date of the original restoration when the need for the restoration is due to pulpal necrosis (root canal), traumatic injury to the tooth, or in the event of failed restoration which must be indicated in the beneficiary's treatment records (see Appendix F).

Providers must utilize the e-CDI application to determine whether the beneficiary has received a restoration within the preceding 12-month period from the date of original restoration.

All composite restorations must be placed in a preparation that extends through the enamel and into the dentin. To bill for a particular surface in a complex restoration, the margins of the preparation must extend past the line angles onto the claimed surface. A Class V resin-based composite restoration is a one surface restoration. If the tooth is decayed extensively, a crown should be considered.

The resin-based composite – four or more surfaces or involving incisal angle (D2335 and D2394) is a restoration in which both the lingual and facial margins extend beyond the proximal line angle and the incisal angle is involved. This restoration might also involve all four surfaces of a tooth and not involve the incisal angle. To receive reimbursement for a restoration involving the incisal angle, the restoration must involve at least one-third of the clinical crown of the tooth.

The resin-based composite crown, anterior (D2390) is a single anterior restoration that involves full resin-based composite coverage of a tooth. Providers may request this procedure in cases where two D2332 (Resin-based composite, three surfaces, anterior) restorations would not adequately restore the tooth or in cases where two D2335 (Resin-based composite – four or more surfaces or involving incisal angle, anterior) would be required. Providers may also request this procedure on a tooth that has suffered a horizontal fracture resulting in the loss of the entire incisal segment.

Procedure codes D2330, D2331, D2332, D2335, and D2390 are reimbursable for Tooth Numbers 6 through 11 and 22 through 27 and Tooth Letters C, H, M, and R for beneficiaries under 21 years

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

of age. These procedures are also reimbursable for Tooth Letters D, E, F, G, N. O, P, and Q for beneficiaries under five years of age only.

The resin-based composite – four or more surfaces (D2394) is a single posterior restoration that involves full resin-based composite coverage of a tooth. Providers may bill this procedure in cases where two D2393 (Resin-based composite, three surfaces, posterior) restorations would not adequately restore the tooth.

Procedure codes D2391, D2392, D2393, and D2394 are reimbursable for Tooth Numbers 1 through 5, 12 through 16, 17 through 21, and 28 through 32 and Tooth Letters A, B, I, J, K, L, S, and T.

## **Non-Laboratory Crowns**

Crown services require radiographic images, photographs, other imaging media or other documentation that depict the pretreatment condition. The documentation that supports the need for crown services must be available for review by the Louisiana Department of Health (LDH) or its designee upon request.

#### **Codes**

D2930	Prefabricated Stainless Steel Crown – primary tooth
D2931	Prefabricated Stainless Steel Crown – permanent tooth
D2932	Prefabricated Resin Crown (primary and permanent teeth)
D2933	Prefabricated Stainless Steel Crown with Resin Window
D2934	<b>Prefabricated Esthetic Coated Stainless Steel Crown – primary tooth</b>

Neither stainless steel crowns (D2930 and D2933) nor prefabricated resin crowns (D2932) are reimbursable on primary central or lateral incisors after the **fifth** birthday.

Procedure codes D2930, D2931, D2932, D2933, and D2934 represent final restorations. These restorations must be in direct contact with the periodontally affected gingival tissue. Non-laboratory or chair-side full coverage restorations such as stainless steel and polycarbonate crowns are available but should be considered only when other conventional chair-side types of restorations such as complex amalgams and composite resins are unsuitable.

If a non-laboratory crown is required within the first 12 months after a tooth is restored with amalgam or resin, e.g. fracture of the tooth, pulpal necrosis, etc., the reason why the tooth requires additional restoration must be documented in the beneficiary's treatment record.

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

Crown services require radiographic images (unless contraindicated). Indications such as extensive caries, extensive cervical caries, fractured teeth, replacing a missing cusp, etc. must be radiographically evident and/or documented in the beneficiary's treatment records if radiographic images are medically contraindicated. The documentation that supports the need for crown services must be available for review by LDH or its designee upon request.

#### D2930 Prefabricated Stainless Steel Crown – primary tooth

Stainless steel crowns (D2930) may be placed on primary teeth that exhibit any of the following indications, when failure of other available restorative materials is likely to occur prior to the natural shedding of the tooth:

- Extensive caries;
- Interproximal decay that extends in the dentin;
- Significant, observable cervical decalcification;
- Significant, observable developmental defects, such as hypoplasia and hypocalcification;
- Following pulpotomy or pulpectomy;
- Restoring a primary tooth that is to be used as an abutment for a space maintainer; or,
- Fractured teeth.

Additionally, a stainless steel crown (D2930) may be authorized to restore an abscessed primary second molar (in conjunction with a pulpectomy) prior to the eruption of the permanent first molar to avoid placement of an indicated distal shoe space maintainer.

Stainless steel crowns (D2930) are not medically indicated and reimbursement should not be claimed in the following circumstances:

- Primary teeth with abscess or bone resorption; or
- Primary teeth where root resorption equals or exceeds 75 percent of the root; or
- Primary teeth with insufficient tooth structure remaining so as to have a poor prognosis of success, e.g. un-restorable; or
- Incipient carious lesions.

Procedure code D2930 is reimbursable for Tooth Letters A, B, C, H I, J, K, L, M, R, and S. Procedure code D2930 is reimbursable for Tooth Letters D, E, F, G, N, O, P, and Q for beneficiaries under five years of age only.

#### **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

#### D2931 Prefabricated Stainless Steel Crown – permanent tooth

This procedure is reimbursable for Tooth Numbers 1 through 32.

#### D2932 Prefabricated Resin Crown (primary and permanent teeth)

This procedure is reimbursable for Tooth Numbers 6 through 11 and 22 through 27 and Letters C, H, M and R. This procedure is reimbursable for Tooth Letters D, E, F, G, N, O, P, and Q for beneficiaries under five years of age only.

#### D2933 Prefabricated Stainless Steel Crown with Resin Window

A prefabricated stainless steel crown with resin window is an open-face stainless steel crown with aesthetic resin facing or veneer.

This procedure is reimbursable for Tooth Letters C, H, M, and R. This procedure is reimbursable for Tooth Letters D, E, F, G, N, O, P, and Q for beneficiaries under five years of age only.

## D2934 Prefabricated Esthetic Coated Stainless Steel Crown – primary tooth

A prefabricated esthetic coated stainless steel crown-primary tooth is a stainless steel crown with exterior esthetic coating.

This procedure is reimbursable for Tooth Letters C, H, M, and R. This procedure is reimbursable for Tooth Letters D, E, F, G, N, O, P, and Q for beneficiaries under five years of age only.

#### **Other Restorative Services**

#### **Codes**

D2920	Re-cement Crown
D2950	Core Buildup, including any pins, in addition to crown
D2951	Pin Retention – per tooth, in addition to restoration
D2954	Prefabricated Post in addition to crown
D2999*	Unspecified Restorative Procedure, by report

Procedure codes D2950 and D2954 are intermediate restorative codes for endodontically treated permanent teeth.

## LOUISIANA MEDICAID PROGRAM

ISSUED: 07/01/20 REPLACED: 02/27/19

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

Adequate documentation describing the situation requiring treatment and the treatment proposed must be recorded in the beneficiary's treatment record.

#### **D2920** Re-cement Crown

The billing provider is responsible for recementation within the first 12 months after placement of the crown.

This procedure is reimbursable for Tooth Numbers 1 through 32 and Letters A through T.

## D2950 Core Buildup, including any pins, in addition to crown

This procedure refers to the building up of anatomical crown when restorative crown will be placed, whether or not pins are used. This procedure is reimbursable for permanent teeth that have undergone endodontic treatment only. A core build-up cannot be authorized in conjunction with a post and core or for primary teeth.

This procedure is reimbursable for Tooth Numbers 2 through 15 and 18 through 31.

#### D2951 Pin Retention – per tooth, in addition to restoration

Reimbursement for pins is limited to one per tooth, within a 12-month period and may be billed only in conjunction with the complex restoration codes D2160 or D2161.

This procedure is reimbursable for Tooth Numbers 2 through 5, 12 through 15, 18 through 21, and 28 through 31.

#### D2954 Prefabricated Post and core in addition to crown

Refers to a core built around a pre-fabricated post when a restorative crown will be placed. This procedure includes the core material. The post and core can be used on endodontically treated permanent teeth (2-15 and 18-31) when there is insufficient natural tooth structure to receive the final full coverage restoration. The post must extend at least one-third the length of the root and must closely approximate the canal walls. This procedure is not reimbursable in combination with a core build-up.

This procedure is reimbursable for Tooth Numbers 2 through 15 and 18 through 31.

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

#### D2999\* Unspecified Restorative Procedure, by report

This procedure code is used for a procedure that is not adequately described by another code. Please describe the situation requiring treatment and the treatment proposed in the "Remarks" section of the claim form when submitting for prior authorization.

## **Endodontic Therapy Services**

#### **Codes**

D3110	Pulp Cap – direct (excluding final restoration)
D3220	Therapeutic Pulpotomy (excluding final restoration)
D3222	Partial Pulpotomy for Apexogenisis – permanent tooth with incomplete root
	development
D3240	Pulpal Therapy (resorbable filling), – posterior, primary tooth (excluding final
	restoration)
D3310	Endodontic Therapy, Anterior Tooth (excluding final restoration)
D3320	Endodontic Therapy, Premolar Tooth (excluding final restoration)
D3330	Endodontic Therapy, Molar Tooth (excluding final restoration)
<b>D3346</b>	Retreatment of previous root canal therapy - anterior
D3352	Apexification/recalcification –interim medication replacement
<b>D3410</b>	Apicoectomy - anterior
D3430	Retrograde Filling - per root
D3999*	Unspecified Endodontic Procedure, by report

## **Pulp Capping**

#### **D3110** Pulp Cap – direct (excluding final restoration)

Pulp capping is reimbursable when calcium hydroxide or other ADA accepted pulp-capping material is placed directly on an exposed pulp. Indirect pulp caps are not covered. The program does not cover pulp caps in primary teeth. Pre-operative radiographic images must substantiate the need for this service.

This procedure is reimbursable for Tooth Numbers 1 through 32.

## **Pulpotomy**

D3220 Therapeutic Pulpotomy (excluding final restoration) – removal of pulp coronal to the dentinocemental junction and application of medicament

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

Procedure code D3220 is reimbursable for Tooth Letters A through T. However, this procedure is reimbursable for Tooth Letters D, E, F, G, N, O, P, and Q for beneficiaries under five years of age only.

This service is defined as the surgical removal of the coronal portion of the pulp and completely filling the pulp chamber with a restorative material. It should not be applied to primary teeth where the roots show signs of advanced resorption (more than two-thirds of the root structure is resorbed), where there are radiographic signs of infection in the surrounding bone, or where there is mobility on clinical evaluation.

This procedure is limited to once every 24-month period, per tooth.

## D3222 Partial Pulpotomy for Apexogenesis – permanent tooth with incomplete root development

This procedure is reimbursable for Tooth Numbers 2 through 15 and 18 through 31. This service is defined as the removal of a portion of the pulp and application of medicament with the aim of maintaining the vitality of the remaining portion to encourage continued physiological development and formation of the root. This procedure is not constructed as the first stage of endodontic therapy.

This service is reimbursable only once per 12-month period, per tooth.

## **Endodontic Therapy on Primary Teeth**

## D3240 Pulpal Therapy (resorbable filling) – posterior, primary tooth (excluding final restoration) (pulpectomy)

The Medicaid program provides for the endodontic treatment of posterior second primary molars (A, J, K or T) requiring complete extirpation of all pulpal material and filling with a resorbable filling material.

This procedure is not reimbursable on primary incisors, cuspids, and first primary molars. If the endodontic pathology on these teeth cannot be treated with a pulpotomy, then extraction and space maintenance may be indicated.

This procedure code is limited to a primary second molar in an arch (maxillary or mandibular), when the first permanent molar has not erupted and when a pulpectomy will eliminate the necessity for extraction and the placement of a distal shoe space maintainer. A pulpectomy should not be

## LOUISIANA MEDICAID PROGRAM

ISSUED: 07/01/20 REPLACED: 02/27/19

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

provided in cases where the primary roots are more than half-resorbed or when the six-year molar has erupted.

Intra-operative radiograph(s), which must include a post-operative radiograph, are included in the reimbursement for the pulpal therapy and must be maintained in the beneficiary's treatment record. This procedure is reimbursable for Tooth Letters A, J, K, and T.

## **Endodontic Therapy**

D3310	<b>Endodontic Therapy, anterior (excluding final restoration)</b>
D3320	<b>Endodontic Therapy, premolar (excluding final restoration)</b>
D3330	<b>Endodontic Therapy, molar (excluding final restoration)</b>

Complete endodontic therapy (procedures D3310, D3320 and D3330) includes treatment plan, all appointments necessary to complete treatment, clinical procedures, all intraoperative radiographic images (which must include a post-operative radiograph) and follow-up care.

Medical necessity for all endodontic procedures must be documented in the beneficiary's treatment record and be supported by radiographic documentation. If the radiographic images do not indicate the need for endodontic therapy, the provider must include a written statement as to why the endodontic therapy is necessary.

The beneficiary's treatment records should include a treatment plan supported by sufficient, readable, most-current bitewings and current periapical radiographic images, as applicable, to judge the general oral health status of the beneficiary. Specific treatment plans for final restoration of the tooth must be indicated. If the radiographic images do not indicate the need for a root canal, the provider must include a written statement as to why the root canal is necessary. Root canal therapy should depend on the prognosis of the affected tooth, the condition of the other teeth in the mouth, and the past history of the beneficiary's oral care.

Providers are reminded that if specific treatment needs are identified during post payment review and not noted by the provider or if the radiographic images do not adequately indicate the need for the root canal requested, recoupment will be initiated.

In cases where multiple root canals are requested or when teeth are missing or in need of endodontic therapy in the same arch, a partial denture may be indicated. Third molar root canals are not reimbursable.

The date of service on the payment request **must** reflect the final treatment date. Intra-operative radiograph(s), which must include a post-operative radiograph, are included in the reimbursement

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

for the root canal and must be maintained in the beneficiary's treatment record. Written documentation must also include the type of filling material used as well the notation of any complications encountered which may compromise the success of the endodontic treatment.

#### D3310 Endodontic Therapy, anterior (excluding final restoration)

This procedure is reimbursable for Tooth Numbers 6 through 11 and 22 through 27.

## D3320 Endodontic Therapy, premolar (excluding final restoration)

This procedure is reimbursable for Tooth Numbers 4, 5, 12, 13, 20, 21, 28, and 29.

#### D3330 Endodontic Therapy, molar (excluding final restoration)

This procedure is reimbursable for Tooth Numbers 2, 3, 14, 15, 18, 19, 30, and 31.

#### **Endodontic Retreatment**

## D3346 Retreatment of previous root canal therapy – anterior

This procedure is reimbursable only to a different provider or provider group than whom originally performed the initial root canal therapy, and is reimbursable for Medicaid eligible beneficiaries under 21 years of age.

An anterior root canal retreatment is not payable to the same dentist or dental group who performed the initial root canal. Beneficiaries may seek the service from a different dentist (dental group).

Procedure D3346 may include the removal of post, pin(s), old root canal filling material, and the procedures necessary to prepare the canal and place the canal filing. This includes complete root canal therapy. The reimbursement for this procedure includes all appointments necessary to complete the treatment and all intra-operative radiographic images. The date of service on the payment request must reflect the final treatment date. Intra-operative radiograph(s), which must include a post-operative radiograph, are included in the reimbursement for the retreatment of the root canal and must be maintained in the beneficiary's treatment records.

Consideration of root canal retreatment should depend on the prognosis of the affected tooth, the condition of the other teeth in the mouth, and history of the beneficiary oral care. The beneficiary's treatment records should include sufficient readable, most current bitewings and current periapical radiographic images, as applicable, to judge the general oral health status of the beneficiary. Specific treatment plans for final restoration of the tooth should also be included.

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

If the radiographic images do not indicate the need for a root canal, the provider must include a written statement as to why the root canal retreatment is necessary in the treatment records. If a fistula is present, a clear oral/facial image (photograph) is required and will be reimbursable in situations where dental radiographic images do not adequately indicate the necessity for the requested retreatment of previous root canal therapy.

There will be a recoupment of money paid for all unnecessary root canal treatments if specific treatment needs are identified during post payment review and not noted by the provider in the beneficiary's treatment records or if the radiographic images do not adequately indicate the need for the retreatment of a previous root canal.

## **Apexification/Recalcification Procedure**

## D3352 Apexification / Recalcification – interim medication (excluding root canal)

Apexification is defined as the placement of medication within a root canal space to promote biological closure of the apex. This service is limited to a maximum of three treatments per tooth with the root canal being billed separately. This service is available to both anterior and posterior permanent teeth and should be considered when the tooth fulfills all requirements for a root canal, as well as an open apex, which cannot be sealed using conventional endodontic technique. In order to obtain optimal results for these services, a three-month period must elapse between start of the root canal, each step in the treatment as well as the final endodontic fill.

This procedure is reimbursable for Tooth Numbers 2 through 15 and 18 through 31.

#### Apicoectomy/Periradicular Services

#### D3410 Apicoectomy/ periradicular surgery – anterior

Periradicular surgery of the root surface (apicoectomy), repair of a root perforation or resorptive defect, exploratory curettage to look for root fractures, removal of extruded filling materials or instruments, removal of broken root fragments, sealing of accessory canals, etc. It does not include retrograde filling materials.

This procedure is reimbursable for Tooth Numbers 6 through 11 and 22 through 27.

#### D3430 Retrograde filling

#### **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

This procedure is to be reported for placement of retrograde filling material during periradicular surgery procedures on anterior teeth only. This procedure will be reimbursed only in conjunction with code D3410.

This procedure is reimbursable for Tooth Numbers 6 through 11 and 22 through 27.

#### **Other Endodontic Procedures**

## D3999\* Unspecified Endodontic Procedure, by report

This procedure code is used for a procedure that is not adequately described by another code. It requires PA. Please describe the situation requiring treatment and the treatment proposed in the "Remarks" section of the claim form when submitting for prior authorization.

#### **Periodontal Services**

Periodontal services include gingivectomy, periodontal scaling and root planning, full mouth debridement, and unspecified periodontal procedures. Local anesthesia is considered part of periodontal procedures.

#### **Codes**

<b>D4210</b>	Gingivectomy or gingivoplasty – four or more contiguous teeth or bounded teeth
	spaces per quadrant
D4341	Periodontal scaling and root planning, per quadrant
D4355	Full mouth debridement to enable a comprehensive oral evaluation and diagnosis
D4999*	Unspecified periodontal procedure, by report

## **Surgical Periodontal Services**

## D4210 Gingivectomy or gingivoplasty – four or more contiguous teeth or bounded teeth spaces per quadrant

This procedure involves the excision of the soft tissue wall of the periodontal pocket by either an external or an internal bevel. It is performed to eliminate suprabony pockets after adequate initial preparation, to allow access for restorative dentistry in the presence of suprabony pockets, and to restore normal architecture when gingival enlargements or asymmetrical or unaesthetic topography is evident with normal bony configuration.

#### **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

A gingivectomy is only allowed when the tissue growth interferes with mastication as sometimes occurs from Dilantin therapy.

Explanations or reasons for treatment and a photograph of the affected area(s) must be indicated in the beneficiary's treatment records.

This procedure is reimbursable for Oral Cavity Designation areas 10, 20, 30, and 40.

## **Non-surgical Periodontal Services**

## D4341 Periodontal scaling and Root Planing – four or more contiguous teeth or bounded teeth spaces per quadrant

Radiographic evidence of large amounts of subgingival calculus, deep pocket formation, and bone loss must be submitted. This procedure involves instrumentation of the crown and root surfaces of the teeth to remove plaque and calculus from these surfaces as well as the removal of rough, calculus-contaminated cementum and dentin. It is therapeutic—not prophylactic—in nature, usually requiring local anesthesia.

Radiographic evidence of bone loss indicating a true periodontal disease state must be maintained in the beneficiary's treatment for review with bitewings and/or posterior/anterior periapicals. This service is not allowable for beneficiaries who have not progressed beyond the mixed dentition stage of development.

Only two units of periodontal scaling and root planing may be reimbursed per day. For beneficiaries requiring hospitalization for dental treatment, a maximum of four units of procedure code D4341 may be paid on the same date of service. The claim form used to request reimbursement must identify the "Place of Treatment" (Block 38) and "Treatment Location" (Block 56) if the service was performed at a location other than the primary office.

This procedure is reimbursable for Oral Cavity Designation areas 10, 20, 30, and 40.

This service is reimbursable only once in a 12-month period.

## D4355 Full Mouth Debridement to enable a comprehensive oral evaluation and diagnosis

This procedure involves full mouth debridement involving the preliminary removal of plaque and calculus that interferes with the ability of the dentist to perform a comprehensive oral evaluation. This procedure is not to be completed on the same day as a comprehensive oral evaluation (D0150).

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

This service must be performed at the initial visit if this service is indicated.

No other dental services except examination, radiographic images or oral/facial photographic images are reimbursable on the same date of service as full mouth debridement. When an exam is performed on the same date of service as a full mouth debridement, the exam must be performed after completion of the full mouth debridement.

Only one full mouth debridement is allowed in a 12-month period. This procedure will not be reimbursed if payment has previously been made for an Adult Prophylaxis (D1110) or Child Prophylaxis (D1120) to any provider.

Bitewing radiographic images that supply evidence of significant posterior supra and/or subgingival calculus in at least two quadrants must be maintained in the beneficiary's treatment record. In the occasional instance where the bitewing radiographic images do not supply evidence of significant calculus in at least two quadrants, Oral/facial photographic images that provide evidence of significant plaque and calculus are required.

Prior to a Full Mouth Debridement, providers must ask their new beneficiaries when they last received a Medicaid covered prophylaxis (D1110 or D1120) and record that information in the beneficiary's treatment record.

For the established patient/beneficiary, the provider must check the office treatment record to ensure that it has been over 12 months since a D1110 or D1120 was reimbursed by Medicaid. If it is determined that it has been less than 12 months, the beneficiary must reschedule for a later date, which exceeds the 12-month period.

#### **Other Periodontal Services**

#### D4999\* Unspecified Periodontal Procedure, by report

This procedure code is used for a procedure that is not adequately described by another code. It requires PA. Please describe the situation requiring treatment and the treatment proposed in the "Remarks" section of the claim form when submitting for prior authorization.

#### **Removable Prosthodontics**

Removable prosthodontic services include complete dentures, partial dentures, denture repairs and denture relines.

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

Documentation requirements are included to conform to federal and state regulations concerning the necessity of documentation linked to the payment for services funded by both the state and federal government.

#### **Minimum Standards for Complete and Partial Denture Prosthodontics**

Denture services provided to beneficiaries under the Medicaid Program must follow acceptable techniques in all stages of construction, such as preliminary and final impressions, wax rim and esthetic try-in, processing, delivery and adjustment. Although no minimum number of appointments is set, the following minimum standards must be adhered to:

- The providers are required to obtain beneficiary esthetic acceptance prior to processing. This acceptance must be documented by the beneficiary's signature in the treatment record.
- The denture should be flasked and processed under heat and pressure in a commercial or dental office laboratory using ADA certified materials. The prosthetic prescription and laboratory bill (or a copy) must be maintained in the beneficiary's treatment record.
- Upon delivery:
  - The denture bases must be stable on the lower and retentive on the upper.
  - The clasping must be appropriately retentive for partial dentures.
  - The vertical dimension of occlusion should be comfortable to the beneficiary (not over-closed or under-closed). The proper centric relation of occlusion should be established for complete dentures or partial dentures opposing full dentures. For partial dentures opposing natural dentition or another partial denture, the occlusion must be harmonious with the opposing arch.
  - The denture must be fitted and adjusted for comfort, function, and aesthetics.
  - The denture must be finished in a professional manner; it must be clean, exhibit a high gloss, and be free of voids, scratches, abrasions, and rough spots.

The dentist is responsible for all necessary adjustments for a period of six months.

## LOUISIANA MEDICAID PROGRAM

ISSUED: 07/01/20 REPLACED: 02/27/19

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

Records must include a chronological (dated) narrative account of each beneficiary visit indicating what treatment was performed/provided or what conditions were present on those visits. A check off list of codes for services billed as well as copies of claim forms submitted is deemed insufficient documentation of services delivered.

If the beneficiary refuses delivery of the complete or partial denture, it cannot be considered delivered.

Failure to deliver a minimally acceptable full or partial denture, failure to provide adequate followup care, or failure to document the services provided will be considered grounds for recouping the fee paid for the denture.

#### **Denture Identification Information**

All full and partial dentures (excluding interim partials, D5820 and D5821) reimbursed under the Medicaid EPSDT Dental Program must have the following unique identification information processed into the acrylic base:

- The first four letters of the beneficiary's last name and first initial;
- The month and year (00/00) the denture was processed; and
- The last five digits of provider's Medicaid ID number.

## **Complete Dentures**

#### Codes

D5110\* Complete Denture - maxillary
D5120\* Complete Denture - mandibular
D5130\* Immediate Denture - maxillary
D5140\* Immediate Denture - mandibular

Only one prosthesis per beneficiary per arch is allowed in a <u>five</u>-year period. The time period for eligibility for a new prosthesis for the same arch begins on the delivery date of original prosthesis. Once the beneficiary becomes 21 years of age, the rules of the Adult Denture Program apply.

All missing teeth must be marked on the claim form. Radiographic images documenting the necessity for complete denture(s) must be submitted with the request for prior authorization. If an

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

immediate denture is requested, the provider must state the reasons for the request in the "Remarks" section of the claim form.

Immediate dentures are not considered temporary. The provider must inform the beneficiary that no reline will be reimbursed by Medicaid within one year of the denture delivery.

If there will be teeth remaining on the date of denture delivery, only the immediate full denture codes (D5130 and/or D5140) may be prior authorized. Radiographic images should confirm that no more than six teeth remain; or if more than six teeth remain, the attending dentist must certify by statement in the "Remarks" section that six or fewer teeth will remain when the final impression is taken.

An immediate denture that is not delivered cannot be reimbursed nor will Medicaid reimburse any payment under the interruption of treatment guidelines (see section 16.1).

#### **Partial Dentures**

#### Codes

- D5211\* Maxillary partial denture resin base (including retentive/clasping materials, rests and teeth)
- D5212\* Mandibular partial denture resin base (including retentive/clasping materials, rests and teeth)
- D5213\* Maxillary partial denture cast metal framework with resin denture bases (including retentive/clasping materials, rests and teeth)
- D5214\* Mandibular partial denture cast metal framework with resin denture bases (including retentive/clasping materials, rests and teeth)
- D5820\* Interim partial denture (maxillary) Includes any necessary clasps and rests.
- D5821\* Interim partial denture (mandibular) Includes any necessary clasps and rests.

Only one prosthesis (excluding interim partial dentures) per beneficiary per arch is allowed in a five-year period. The time period for eligibility for a new prosthesis for the same arch begins on the delivery date of original prosthesis. An interim partial denture cannot be authorized to replace a partial denture that was previously paid by Medicaid of Louisiana. Once the beneficiary becomes 21 years of age, the rules of the Adult Denture Program apply.

To receive consideration for approval for cast partial dentures, providers must submit periapical radiographic images of the abutment teeth and bitewings with the treatment plan.

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

A description of the arch receiving the prosthesis must be provided by indicating which teeth are to be replaced and which are to be retained. The provider must use the following symbols in Block 34 of the ADA Dental Claim Form to indicate tooth status:

- "X" will be used to identify missing teeth; and
- "/" will be used to identify teeth to be extracted.

The design of the prosthesis and materials used should be as simple as possible and consistent with basic principles of prosthodontics.

## Only permanent teeth are eligible for replacement by an interim partial denture or a partial denture.

Opposing partial dentures are available if each arch independently fulfills the requirements.

Partial dentures that replace only posterior teeth must occlude against <u>multiple</u> posterior teeth in the opposing arch, and must serve to increase masticatory function and stability of the entire mouth.

The overall condition of the mouth is an important consideration in whether or not a partial denture is authorized. For partial dentures, abutment teeth must be caries free or have been completely restored and have sound periodontal support. On beneficiaries requiring extensive restorations, periodontal services, extractions, etc. post-treatment radiographic images may be requested prior to approval of a partial denture.

Medicaid may provide an acrylic interim partial denture (D5820/D5821) in the mixed dentition or beyond the mixed dentition stages in the following cases:

- Missing one or two maxillary permanent anterior tooth/teeth;
- Missing two mandibular permanent anterior teeth; or
- Missing three or more permanent teeth in the same arch (of which at least one must be anterior).

Medicaid may provide a partial denture in cases where the beneficiary has matured beyond the mixed dentition stage in the following cases:

- Missing three or more maxillary anterior teeth;
- Missing two or more mandibular anterior teeth;
- Missing at least 3 adjacent posterior permanent teeth in a <u>single quadrant</u> when the
  prosthesis would restore masticatory function (third molars not considered for
  replacement);

## LOUISIANA MEDICAID PROGRAM

ISSUED: 07/01/20 REPLACED: 02/27/19

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

• Missing at least 2 adjacent posterior permanent teeth in both quadrants of the same arch when the prosthesis would restore masticatory function in at least one quadrant (third molars not considered for replacement); or

• Missing a combination of two or more anterior and at least one posterior tooth (excluding wisdom teeth and the second molar) in the same arch.

Cast partials (D5213 and D5214) will be considered only for those beneficiaries who are 18 years of age or older. In addition, the coronal and periodontal integrity of the abutment teeth and the overall condition of the remaining teeth will dictate whether a cast or acrylic partial is approved. Radiographic images should verify that all pre-prosthetic services have been successfully completed. On beneficiaries requiring extensive restorations, periodontal services, extractions, etc. post treatment radiographic images may be requested prior to approval of a cast partial denture.

## **Denture Repairs**

#### **Codes**

D5511	Repair broken complete denture base, mandibular
D5512	Repair broken complete denture base, maxillary
D5520	Replace missing or broken tooth – complete denture – per tooth
D5611	Repair resin partial denture base, mandibular
D5612	Repair resin partial denture base, maxillary
D5630	Repair or replace broken retentive/ clasping materials – per tooth
D5640	Replace missing or broken tooth – per tooth
D5650	Add tooth to existing partial denture – per tooth
D5660	Add clasp to existing partial denture

Reimbursement for repairs of complete and partial dentures (excluding interim partial dentures) are allowed only if more than one year has elapsed since denture insertion by the same billing provider or another Medicaid provider located in the same office as the billing provider and the repair makes the denture fully serviceable and eliminates the need for a new denture.

If the same provider/provider group (or another Medicaid-enrolled provider located in the same office as the requesting provider) requests a complete or partial denture within the first year after a repair is paid, the repair fee for that arch will be deducted from the new prosthesis fee. A repair is allowed in conjunction with a reline on the same beneficiary as long as the repair makes the denture fully serviceable.

There is a limit to how much a provider can bill within a single year for base repair, clasp addition or replacement, or tooth addition or replacement services per arch for the same beneficiary. This limit applies to the billing provider or another Medicaid-enrolled provider located in the same

## LOUISIANA MEDICAID PROGRAM

ISSUED: 07/01/20 REPLACED: 02/27/19

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

office as the requesting provider. See the EPSDT Fee Schedule (Appendix A) on the Louisiana Medicaid website for limit.

Procedure Codes D5511, D5512, D5611, D5612 are reimbursable for Oral Cavity Designation areas 01 or 02.

The fee assigned for the first tooth billed using the codes D5520 or D5640 or D5650 will reflect the base price for the first denture tooth. When multiple teeth are replaced or added to the same prosthesis on the same date of service, the same procedure code is to be used for each tooth. However, the fee assigned for the additional teeth will reflect the additional allowance per tooth as indicated in the EPSDT Fee Schedule (Appendix A).

Procedures D5520, D5640 and D5650 are reimbursable for Tooth Numbers 2 through 15 and 18 through 31.

Procedure Codes D5630 and D5660 are reimbursable for Oral Cavity Designation areas 10, 20, 30, and 40.

Minimal procedural requirements for repair services include the following:

- The prosthesis should be processed under heat and pressure in a commercial or dental office laboratory using ADA certified materials. The prosthetic prescription and laboratory bill (or a copy) must be maintained in the beneficiary's treatment record.
- Repairs must make the prosthesis fully serviceable, retaining proper vertical dimension and centric relation of occlusion.
- The prosthesis must be finished in a skillful manner; be clean, exhibit a high gloss, and be free of voids, scratches, abrasions, and rough spots.
- The treatment record must specifically identify the location and extent of the breakage, including the side of the prosthesis involved (right or left).

Failure to provide adequate documentation of services billed as repaired when requested by LDH or its authorized representative will result in recoupment of monies paid by the program for the repair.

# **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

#### **Denture Relines**

#### **Codes**

D5750	Reline complete maxillary denture - Laboratory Reline
D5751	<b>Reline complete mandibular denture - Laboratory Reline</b>
<b>D5760</b>	Reline maxillary partial denture - Laboratory Reline
D5761	Reline mandibular partial denture - Laboratory Reline

Reimbursement for complete and partial denture relines are allowed only if one year has elapsed since the previous complete or partial denture was constructed or last relined. If billing provider requests a complete or partial denture for the same arch within one year after delivery of the reline, the reline fee will be deducted from the new prosthesis fee. A combination of two complete or partial denture relines or one complete or partial denture and one reline in the same arch are allowed in a five-year period.

Reline of existing dentures must be given priority over the construction of new dentures if it is judged that the existing dentures are serviceable for at least five years. Chair-side relines (cold cure acrylics) are not reimbursable.

Minimal procedural requirements for reline services include the following:

- All tissue bearing areas of the denture or saddle areas of the partial must be properly relieved to allow for the reline material.
- Occlusal vertical dimensions and centric relationships must be retained or reestablished if lost.
- Relines must be flasked and processed under heat and pressure in a commercial or office laboratory.
- Relines must be finished in a skillful manner; they must be clean; they must exhibit a high gloss; and they must be free of voids, scratches, abrasions, and rough spots.
- The denture must be fitted and adjusted for comfort and function.

# The dentist is responsible for all necessary adjustments for a period of six months.

Failure to deliver a minimally acceptable reline, failure to provide adequate follow-up care, or failure to provide adequate documentation of services billed as relined when requested by LDH or its authorized representative will result in recoupment of the fee paid for the reline.

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

#### **Other Removable Prosthodontics**

#### D5899\* Unspecified removable prosthodontic procedure, by report

This procedure code is used for a procedure that is not adequately described by another code. Adequate documentation describing the situation requiring treatment and the treatment proposed must be indicated in the beneficiary's treatment record.

#### **Maxillofacial Prosthetics**

#### **D5986** Fluoride Gel Carrier

A fluoride gel carrier, is a prosthesis that covers the teeth in either dental arch and is used to apply topical fluoride in close proximity to tooth enamel and dentin for several minutes daily.

This service is only available for beneficiaries who are undergoing or who have undergone head and neck radiation therapy.

This procedure includes the materials necessary for the fabrication and delivery of a non-disposable, vacuum molded soft vinyl prosthesis adapted to the beneficiary's dental arch.

This procedure is reimbursable for Oral Cavity Designation areas 01 and 02.

#### **Fixed Prosthodontics**

#### **Codes**

D6241	Pontic – porcelain fused to predominantly base metal
D6545	Retainer – cast metal for resin bonded fixed prosthetics
D6999*	Unspecified, fixed prosthodontic procedure, by report

When a patient is missing a single maxillary anterior incisor a resin-bonded fixed prosthesis (Maryland-type bridge consisting of two retainers and a pontic) is allowed for reimbursement. The following requirements apply:

- The beneficiary must have attained the age of sixteen.
- The abutment teeth must be caries free and restoration-free and have sound periodontal support.

#### **CHAPTER 16: DENTAL SERVICES**

# SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

- No other maxillary teeth are missing or require extraction.
- Periapical radiographic images of the abutment teeth and bitewings showing that all other treatment needs in the maxillary arch have been completed.
- On the tooth number chart on the ADA form, "X" out the missing tooth.

The overall condition of the mouth is an important consideration in whether or not a fixed partial denture is necessary. A removable partial denture should be provided if multiple anterior teeth or if any posterior teeth are missing in the maxillary arch.

Only one Maryland-type bridge can be authorized in a five-year period.

#### **Fixed Partial Denture Pontic**

## D6241 Pontic – porcelain fused to predominantly base metal

This code is only reimbursable when submitted in conjunction with code D6545. Procedure code D6241 is limited to one per beneficiary, in a five-year period.

This procedure is reimbursable for Tooth Number 7, 8, 9, and 10.

#### **Fixed Partial Denture Retainer**

# D6545 Retainer – cast metal for resin bonded fixed prosthetics

This code is only reimbursable when submitted in conjunction with code D6241. Procedure code D6545 is limited to two per beneficiary, in a five-year period.

This procedure is reimbursable for Tooth Numbers 6, 7, 8, 9, 10 and 11.

#### **Other Fixed Partial Denture Services**

#### D6999\* Unspecified, fixed prosthodontic procedure, by report

This procedure code is used for a procedure that is not adequately described by another code. It requires prior authorization. Please describe the situation requiring treatment and the treatment proposed in the "Remarks" section of the claim form when submitting for prior authorization.

# **Oral and Maxillofacial Surgery Services**

# **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

The services listed below are the oral and maxillofacial surgery services covered under the EPSDT Dental Program.

**NOTE:** Dental providers who are qualified to bill for services using the Current Physician's Terminology (CPT) codes, may bill certain non-dental oral surgery services using the CPT codes, which are covered under the Professional Services Program when those services are rendered to Medicaid beneficiaries who are eligible for services provided in the Professional Services Program. Refer to the Professionals Services Provider Manual, Chapter 5, Section 5.1 for specific details.

## **Codes**

D7111	Extraction, coronal remnants – primary tooth
<b>D7140</b>	Extraction, erupted tooth or exposed root (elevation and/or forceps removal)
D7210	Extraction, erupted tooth requiring removal of bone and/or sectioning of tooth,
	and including elevation of mucoperiosteal flap if indicated
D7220	Removal of impacted tooth – soft tissue
D7230	Removal of impacted tooth - partial bony
D7240	Removal of impacted tooth - completely bony
D7241	Removal of impacted tooth - completely bony, with unusual surgical
	complications
D7250	Removal of residual tooth roots (cutting procedure)
D7270	Tooth reimplantation and/or stabilization of accidentally evulsed or displaced
	tooth
D7280	Exposure of an unerupted tooth
D7283	Placement of device to facilitate eruption of impacted tooth
D7285	Biopsy of oral tissue – hard (bone, tooth)
D7286	Biopsy of oral tissue – soft (all others)
D7291	Transseptal fiberotomy/supra crestal fiberotomy, by report
D7310	Alveoloplasty, in conjunction with extractions – per quadrant
D7510	Incision and drainage of abscess – intraoral soft tissue
D7880	Occlusal orthotic device, by report
D7910	Suture of recent small wound up to 5 cm
D7960	Frenulectomy (frenectomy or frenotomy) – separate procedure
D7997	Appliance removal (not by dentist who placed appliance), includes removal of
	archbar
D7999*	Unspecified oral surgery procedure, by report

These codes include local anesthesia, suturing (if needed), and routine post-operative care.

ISSUED: 07/01/20 REPLACED: 02/27/19

# **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

Post-payment reviews have shown that a number of providers are billing for the extraction of primary teeth in the advanced stages of natural exfoliation, with little or no therapeutic indication or benefit. Primary teeth that are being lost naturally must not be billed to Medicaid as an extraction. If a practice is noted during post-payment review of billing for the extraction of primary teeth that are shown radiographically to be in the advanced stages of root resorption (more than ¾ of the root resorbed), i.e., exfoliating naturally, there will be a recoupment of money paid for all such therapeutically unnecessary extractions.

If the extraction is warranted due to therapeutically indicated circumstances such as prolonged retention, blocking out of erupting permanent teeth, severe decay, abscess with bone loss, or other specifically identifiable indications, a preoperative periapical radiograph must be taken as a diagnostic aid and as means of documentation. This radiograph must be maintained in the beneficiary's record, and must be furnished to post-payment review if requested. Written documentation of the reason for the extraction must be noted in the dental treatment record.

Removal of third molars are reimbursable only if symptomatic, and the symptoms must be noted in the beneficiary's records.

The radiographic findings determine the degree of impaction. The claim should list the tooth numbers and will correspond to the Current Dental Terminology (CDT) definitions.

The fee for any extraction (D7210 through D7241) performed on the same tooth which previously received a surgical access of an unerupted tooth (D7280) will be cut back to the maximum fee for the extraction. The fee for code D7140 performed on the same tooth that previously received a surgical access of an unerupted tooth (D7280) will be paid at \$0 since the fee for D7280 exceeds the maximum fee for the extraction.

Procedure codes D7140, D7210, D7220, D7230, D7240, D7241, and D7250 are reimbursable for Tooth Number 1 through 32 and A through T. ADA codes for Supernumerary Teeth 51 through 82 and AS through TS should be used when needed.

# **Non-surgical Extractions**

# **D7111** Extraction, Coronal Remnants – primary tooth

Removal of soft tissue-retained coronal remnants for deciduous teeth only. This procedure code is reimbursable for Tooth Letters A through T and AS through TS. All primary teeth within six months of the ADA's shed age chart requires an x-ray.

# **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

# D7140 Extraction erupted tooth or exposed root (elevation and/or forceps removal)

This procedure includes routine removal of tooth structure, minor smoothing of socket bone and closure as necessary.

# **Surgical Extractions**

# D7210 Surgical removal of erupted tooth requiring elevation of mucoperiosteal flap and removal of bone and/or section of tooth

This procedure includes the cutting of gingiva and bone, removal of tooth structure, minor smoothing of socket bone, and closure.

If the patient's record does not clearly demonstrate the need for the cutting of gingiva and removal of bone and/or sectioning of tooth structure, all records may be reviewed and recoupment of payment for services will be initiated.

#### D7220 Removal of impacted tooth - soft tissue

The occlusal surface of the tooth is covered by soft tissue and removal of the tooth requires mucoperiosteal flap elevation.

# D7230 Removal of impacted tooth - partial bony

Part of crown covered by bone; requires mucoperiosteal flap elevation and bone removal.

#### D7240 Removal of impacted tooth - complete or full bony

Most or all of crown covered by bone; requires mucoperiosteal flap elevation and bone removal.

# D7241 Removal of impacted tooth - completely bony, with unusual surgical complications

Most or all of crown covered by bone; unusually difficult or complicated due to factors such as nerve dissection required, separate closure of maxillary sinus required or aberrant tooth position.

This procedure code will only be authorized on a post-surgical basis.

A copy of the post-surgical operative report and/or treatment record describing the unusual surgical complications, and the radiographic images, must be maintained in the beneficiary's record, and must be furnished to post-payment review if requested.

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

#### D7250 Surgical removal of residual tooth roots (cutting procedure)

This procedure includes the cutting of soft tissue and bone, removal of tooth structure, and closure.

# **Other Surgical Procedures**

# D7270 Tooth reimplantation and/or stabilization of accidentally avulsed or displaced tooth

This procedure includes splinting and/or stabilization. This code is reimbursable for accidental trauma involving permanent anterior teeth only. The date of service and an explanation of the circumstances and procedures performed, including the teeth involved, recorded in the beneficiary's treatment record. This procedure is not reimbursable for periodontal splinting. An Oral Cavity Designator is required on the claim for reimbursement.

This procedure is reimbursable for Oral Cavity Designation areas 01 and 02.

## D7280 Surgical access of an unerupted tooth

This procedure includes an incision, the reflection of tissue, and the removal of bone as necessary to expose the crown of an impacted tooth not intended to be extracted.

This procedure no longer includes the placement of orthodontic attachment. Refer to procedure code D7283 below for information related to the orthodontic attachment.

Procedure Code D7280 is reimbursable for Tooth Numbers 2 through 15 and 18 through 31.

#### D7283 Placement of Device to Facilitate Eruption of Impacted Tooth

This procedure involves the placement of an attachment on an unerupted tooth, after its exposure, to aid in its eruption. Report the surgical exposure separately using D7280.

This procedure is only reimbursable in conjunction with a Medicaid covered comprehensive orthodontic treatment plan.

Procedure Code D7283 is reimbursable for Tooth Numbers 2 through 15 and 18 through 31.

#### D7285 Biopsy of oral tissue – hard (bone, tooth)

This procedure is for the removal of specimen only. It involves the biopsy of osseous lesions and is not to be used for apicoectomy/periradicular surgery.

ISSUED: 07/01/20 REPLACED: 02/27/19

## **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

This procedure is reimbursable for Oral Cavity Designation areas 01, 02, 10, 20, 30, and 40.

#### D7286 Biopsy of Oral Tissue – Soft

This procedure is for the surgical removal of an architecturally intact specimen only, and is not used at the same time as codes for apicoectomy/periradicular curettage.

A copy of the pathology report must be maintained in the beneficiary's treatment records.

This procedure is reimbursable for Oral Cavity Designation areas 01, 02, 10, 20, 30, and 40.

#### D7291 Transseptal fiberotomy/supra crestal fiberotomy, by report

This procedure is only reimbursable in conjunction with Medicaid covered comprehensive orthodontic treatment plan.

This procedure is reimbursable for Oral Cavity Designation areas 01 and 02.

# **Alveoloplasty – Surgical Preparation of Ridge for Dentures**

# D7310 Alveoloplasty in conjunction with extractions – four or more teeth or tooth spaced, per quadrant

A minimum of three adjacent teeth must be extracted. Alveoloplasty during a surgical removal is considered integral to the procedure and will not be reimbursed.

The date of service and an explanation of the circumstances and procedures performed, including the teeth involved recorded and maintained in the beneficiary's treatment record.

This procedure is reimbursable for Oral Cavity Designation areas 01, 02, 10, 20, 30, and 40.

# **Surgical Incision**

#### D7510 Incision and Drainage of abscess – intraoral soft tissue

This service is not reimbursable for primary teeth. It is a specific surgical procedure designed to obtain drainage from a purulent abscess by incision through the mucosa. This procedure is not payable for a particular tooth on the same date of service as the extraction.

This procedure is reimbursable for Tooth Numbers 1 through 32.

# **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

# Temporomandibular Joint (TMJ) Procedure

#### D7880 Occlusal orthotic device, by report

Medicaid reimburses only hard acrylic splints for the treatment of temporomandibular joint dysfunction.

The beneficiary must have an occlusion that has progressed beyond the mixed dentition stage of tooth eruption.

The beneficiary's treatment record must include a completed TMJ Summary Form (see Appendix I). The TMJ Summary Form must indicate whether the condition is acute or chronic and if any other services are to be provided in addition to the requested splint.

This procedure is reimbursable for Oral Cavity Designation areas 01, 02, 10, 20, 30 and 40.

# **Repair of Traumatic Wounds**

#### D7910 Suture recent small wound up to 5cm

Post-operative color photos and rationale is to be documented and maintained within the beneficiary's treatment record.

# **Other Repair Procedures**

#### D7960 Frenulectomy (frenectomy or frenotomy) – separate procedure

This procedure includes the excision of the frenum when the tongue has limited mobility; large diastemas that persist beyond the eruption of the permanent cuspids; or when it is the etiology of periodontal tissue disease and/or to recession of the gingival tissue.

An explanation of the circumstances and the specific dental reason must be recorded in the beneficiary's treatment record.

This procedure is reimbursable for Oral Cavity Designation areas 01, 02, 10, 20, 30, and 40.

# **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

# D7997 Appliance removal (not by dentist who placed appliance), includes removal of archbar

This procedure is for the removal of appliances due to interrupted or discontinued treatment cases.

This procedure is not reimbursable to the same billing provider who placed the appliance or another Medicaid provider located in the same office as the billing provider who placed the appliance. This procedure is reimbursable for Oral Cavity Designation areas 01 and 02.

#### D7999\* Unspecified oral surgical procedure, by report

This procedure code is used for a procedure that is not adequately described by another code. It requires PA. Please describe the situation requiring treatment and the treatment proposed in the "Remarks" section of the claim form when submitting for prior authorization.

# **Orthodontic Services**

#### Codes

D8050	Interceptive orthodontic treatment of the primary dentition
<b>D8060</b>	Interceptive orthodontic treatment of the transitional dentition
<b>D8070</b>	Comprehensive orthodontic treatment of the transitional dentition
<b>D8080</b>	Comprehensive orthodontic treatment of the adolescent dentition
<b>D8090</b>	Comprehensive orthodontic treatment of the adult dentition
D8220	Fixed appliance therapy
D8999*	Unspecified orthodontic procedure, by report

Orthodontic treatment is available to beneficiaries meeting specified criteria. Providers are reminded that Medicaid reimbursement is payment in full for that procedure code.

# **Interceptive Orthodontic Treatment**

D8050	<b>Interceptive orthodontic treatment of the primary dentition</b>
<b>D8060</b>	<b>Interceptive orthodontic treatment of the transitional dentition</b>

Such treatment may occur in the primary or transitional dentition and may include such procedures as the redirection of ectopically erupting teeth, correction of isolated dental crossbite (only one or two teeth, anterior or posterior), or recovery of recent minor space loss where overall space is adequate.

# **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

The fee assigned for fixed appliance therapy includes the brackets/appliance, all visits and adjustments.

This procedure is reimbursable for Oral Cavity Designation areas 01, 02, 10, 20, 30, and 40.

# **Comprehensive Orthodontic Treatment**

D8070 Comprehensive orthodontic treatment of the transitional dentition
D8080 Comprehensive orthodontic treatment of the adolescent dentition
Comprehensive orthodontic treatment of the adult dentition

Only dentists qualified under Chapter 3, Section 301, Parts (C) and (D) of the Rules promulgated by the Louisiana State Board of Dentistry as an approved specialty of "orthodontics and dentofacial orthopedics" are eligible to be reimbursed for Comprehensive Orthodontic Services (procedure codes D8070, D8080, and D8090) in the Medicaid EPSDT Dental Program.

Beneficiaries, who only have crowded dentitions (crooked teeth), excessive spacing between teeth, temporomandibular joint (TMJ) conditions and/or having horizontal/vertical (overjet/overbite) discrepancies, are not eligible to receive comprehensive orthodontic treatment.

This code is used to report the coordinated diagnosis and treatment leading to the improvement of a beneficiary's craniofacial dysfunction and/or dentofacial deformity including anatomical, functional and aesthetic relationships. Treatment usually, but not necessarily, utilizes fixed orthodontic appliances.

Comprehensive orthodontic treatment is allowable by Medicaid <u>only</u> in those instances that are related to an identifiable syndrome such as cleft lip and/or palate, Crozon's syndrome, Treacher-Collins syndrome, Pierre-Robin syndrome, hemi-facial atrophy, hemi-facial hypertrophy; or other <u>severe</u> craniofacial deformities that result in a physically handicapping malocclusion.

Providers are reminded that Medicaid reimbursement is payment in full for the procedure code and should a beneficiary be unable to complete the treatment (for example patient moves away), the reimbursement is subject to recoupment pro-rata based on the number of months of treatment completed.

The beneficiary's treatment records must include sufficient diagnostic material to demonstrate the syndrome and/or deformity listed above and the fee normally charged for a similar case.

To receive reimbursement for comprehensive orthodontic procedure codes, the provider must submit three claim with three distinct dates of service. The first date of service may occur no earlier than the date that diagnostic records were obtained; the second date of service no earlier than the date of banding; and, the final date of service no earlier than 90 days after banding. The

# **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

reimbursement for each claim will not exceed one third of the maximum allowable billable fee in the EPSDT Dental Fee Schedule (Appendix A).

Medicaid reimbursement includes the brackets/appliance and all visits and adjustments.

# **Minor Treatment to Control Harmful Habits**

#### D8220 Fixed appliance therapy

Certain fixed habit appliances will be considered if the appliance would be beneficial to the beneficiary to assist in the correction of a destructive habit such as thumb sucking or tongue thrusting. The beneficiary's treatment records must include sufficient documentation to substantiate the need for and the utility of the appliance.

For approval of procedure code D8220, the following must apply:

- The child must be between the ages of 5 years through 8 years;
- The maxillary incisors (7, 8, 9 and 10) are actively erupting;
- The child still displays the destructive habit; and
- The child has evidenced a desire to stop the destructive habit.

#### **Other Orthodontic Services**

#### D8999\* Unspecified orthodontic procedure, by report

This procedure code is used for a procedure that is not adequately described by another code. It requires PA. Please describe the situation requiring treatment and the treatment proposed in the "Remarks" section of the claim form when submitting for prior authorization.

# **Adjunctive General Services**

#### **Codes**

D9110	Palliative (emergency) treatment of dental pain - minor procedure
D9230	Inhalation of nitrous oxide/analgesia, anxiolysis
D9239	Intravenous moderate conscious sedation/analgesia – first 15 minutes
D9243	Intravenous moderate conscious sedation/analgesia – each additional 15 minutes
D9248	Non-intravenous conscious sedation
D9420	Hospital call
D9440	Office visit – after regularly scheduled hours
D9920	Behavior Management, by report

D9946 Occlusal Guard – hard appliance, partial arch
D9951 Occlusal Adjustment – limited
D9999\* Unspecified adjunctive procedure, by report

# Palliative (Emergency) Treatment

## D9110 Palliative (emergency) treatment of dental pain – minor procedure

Palliative treatment is the treatment of a specific dental complaint and is limited to trauma cases. It is to be used when a specific procedure code is not indicated and a service is rendered to the beneficiary. Records must indicate the tooth or area of the mouth that was treated.

On the date of service that a palliative treatment is rendered, a provider will only be reimbursed for periapical radiographic images (D0220 and D0230), occlusal radiographic images (D0240) if authorized, bitewing radiographic images (D0272), or panoramic radiographic images (D0330) in addition to this procedure code. Panoramic images (D0330) are not allowed on emergency claims unless third molars or a traumatic complaint is involved.

If definitive therapeutic treatment is performed on the same date of service as the palliative treatment, the provider may choose to bill for the definitive therapeutic treatment instead of the palliative treatment.

A maximum of two palliative treatments per beneficiary are available annually. Emergency or palliative dental care services include the following:

- Procedures used to control bleeding;
- Procedures used to relieve pain;
- Procedures used to eliminate acute infection, opening the pulp chamber to establish drainage, and the appropriate pharmaceutical regimen;
- Operative procedures which are required to prevent pulpal death and the imminent loss of teeth, e.g., excavation of decay and placement of appropriate temporary fillings;
- Complaint where assessment is provided, or diagnosis is determined, or referral is made; or

# **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

• Palliative therapy for pericoronitis associated with partially erupted/impacted teeth.

The beneficiary's treatment record must contain a narrative of the specific treatment rendered (tooth number, temporization, opened tooth for drainage, etc.). The treatment provided must **not** be one that the program lists as non-covered nor can it be a treatment that would be covered under a specific dental service code.

If endodontic therapy is anticipated and the provider has not already obtained bitewing radiographic images, bitewing radiographic images must be taken for inclusion with the request for PA of the root canal, in addition to any periapical radiographic images taken for diagnosis of the affected tooth.

#### Anesthesia

# D9230 Nitrous Oxide - analgesia, anxiolysis, inhalation of nitrous oxide

Nitrous oxide inhalation analgesia is only payable to providers who possess a personal permit for its administration from the Louisiana State Board of Dentistry and administer it in a State Board approved facility. Nitrous oxide is only reimbursable for dates of service on which restorative and/or surgical services (codes D2140 - D4999 and D7140 - D7999) are performed. Nitrous oxide, if provided, must be billed on the same claim form as the restorative and/or surgical service(s) and may not be submitted more than once per member per day.

If a claim for payment is received for nitrous oxide and there are no restorative and/or surgical service(s) listed on the claim form or no Medicaid claims history record indicating that a restorative and/or surgical service was previously reimbursed for the same date of service as the nitrous oxide, the payment for nitrous oxide will be denied.

**NOTE:** This code is not reimbursable when billed in conjunction with D9248 (Non-intravenous conscious sedation) by any provider.

#### D9239 Intravenous moderate conscious sedation/analgesia – first 15 minutes

#### D9243 Intravenous moderate conscious sedation/analgesia – each additional 15 minutes

Anesthesia time begins when the doctor administering the anesthetic agent initiates the appropriate anesthesia and non-invasive monitoring protocol and remains in the continuous attendance of the beneficiary. Anesthesia services are considered completed when the beneficiary can be safely left under the observation of trained personnel and the doctor may safely leave the room to attend to other patients.

# **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

Intravenous conscious sedation/analgesia can only be performed by doctors who hold a valid permit from the Louisiana State Board of Dentistry for parenteral sedation.

These procedures are only allowable in conjunction with difficult impactions or other extensive surgical procedures done in the office setting.

A maximum of three units of D9243 are available per beneficiary per visit; if requested, each must be listed on a separate claim line for payment.

Anesthesia time record is required when billing D9239 and the three-unit maximum for D9243.

#### **D9248** Non-intravenous conscious sedation

Non-intravenous conscious sedation is a medically controlled state of depressed consciousness while maintaining the beneficiary's airway, protective reflexes and the ability to respond to stimulation or verbal commands. It includes non-intravenous administration of sedative and/or analgesic agent(s) and appropriate monitoring.

Non-intravenous conscious sedation/analgesia can only be performed by doctors who hold a valid permit from the Louisiana State Board of Dentistry for parenteral sedation.

This service is only allowable for children with behavioral problems under the age of six or for older children who are physically or mentally handicapped.

A maximum of four non-intravenous conscious sedation/analgesia administrations, per beneficiary, are available annually by the same billing provider or another Medicaid provider located in the same office as the billing provider.

Non-intravenous conscious sedation is not reimbursable on the same day, by any provider as procedure codes D9230 (Nitrous Oxide) and D9920 (Behavior Management).

The beneficiary's treatment records must adequately document the need for extensive dental restorative or surgical treatment performed in the office setting and must document the need for this service based on prior experience attempting to treat the patient. The provider must indicate the drug(s) anticipated to be used and route(s) of administration in the treatment records.

The use of conscious sedation indicates that the provider intends to administer drugs of a suitable type, strength, and mode of administration that necessitates constant monitoring by the dentist or staff from administration through the time of discharge.

# **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

The conscious sedation form found in Appendix I, must be completed and maintained in the beneficiary's treatment record. If the restorative/surgical phase of the treatment is aborted after the initiation of conscious sedation, the provider must document the circumstances in the beneficiary's treatment record.

Administration of oral pre-medication is not a covered service.

#### **Professional Visits**

## D9420 Hospital call

This code may be reimbursed when providing treatment in hospital outpatient clinic or outpatient ambulatory surgical center, in addition to reporting appropriate code numbers for actual services performed. Those services must be covered under the EPSDT Dental Program (see Appendix A for EPSDT Medicaid covered dental codes).

A hospital call is only reimbursable for dates of service on which restorative and/or surgical services (codes D2140 - D4999 and D7140 - D7999) are performed. A hospital call, if provided, must be billed on the same claim form as the restorative and/or surgical service(s). If a claim or payment is received for a hospital call and there are no restorative and/or surgical service(s) listed on the claim form or no Medicaid claims history record indicating that a restorative and/or surgical service was previously reimbursed for the same date of service as the hospital call, the payment for the hospital call will be denied.

Hospitalization solely for the convenience of the beneficiary or the dentist is not allowed.

Reimbursement for hospital call is limited to beneficiaries under the age of six, unless the child is physically or mentally handicapped.

The notes in the beneficiary's treatment record must adequately justify the need for hospitalization. The provider must document the need for this service based on his experience with prior attempts to treat the patient and the severity of the procedure(s). If the child is physically or mentally handicapped, the records must indicate the particular handicap and its impact on the delivery of dental treatment in the office setting. The beneficiary's treatment records must outline the entire treatment plan with the hospital code listed first or last on one of the pages.

Additionally, the dental office treatment record for the beneficiary must also document the justification for hospitalization including accurate dental charting. A copy of the operative report must be maintained in the beneficiary's dental office treatment record.

Procedure code D9420 is reimbursable once per six-month period, per beneficiary.

# **CHAPTER 16: DENTAL SERVICES**

**SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55** 

#### D9440 Office Visit – after regularly scheduled hours

Procedure code D9440 is to be used for an office visit after regularly scheduled hours for the treatment of a dental emergency. The dental office must be reopened specifically to treat this emergency. The service(s) provided must be reimbursable under the Medicaid EPSDT Dental Program and must be listed on the claim form for reimbursement. A statement describing the situation must be recorded in the beneficiary's treatment records.

#### **Miscellaneous Services**

#### D9920 **Behavior Management**

Additional compensation paid for behavior management is intended to help offset the additional cost of providing care to beneficiaries displaying disruptive or negative behavior during restorative and surgical procedures and may be reimbursed under the following circumstances:

- The management technique involved extends the time of delivering treatment an additional 33% above that required for beneficiaries receiving similar treatment who do not demonstrate negative or disruptive behavior;
- Use of an additional dental personnel/assistant(s); or
- Use of restraint devices such as a papoose board.

Behavior management is reimbursable for beneficiaries below the age of eight, unless documentation indicates that the beneficiary is physically or mentally handicapped. The particular handicap and its impact on the delivery of dental treatment in the office setting must be recorded in the beneficiary's treatment record. Behavior management is not reimbursable when billed in conjunction with D9248 (Non-intravenous conscious sedation) on the same day, by any provider.

Providers must indicate in the beneficiary's treatment records which dental treatment services are scheduled to be delivered at each treatment visit for which a management fee is requested. Behavior management is only reimbursable for dates of service on which restorative and/or surgical services (codes D2140 - D4999 and D7111 - D7999) are performed.

Behavior management, if provided, must be billed on the same claim form as the restorative and/or surgical service (s). If a claim for payment is received for behavior management and there are no restorative and/or surgical service (s) listed on the claim form or no Medicaid claims history record

ISSUED: 07/01/20 REPLACED: 02/27/19

# **CHAPTER 16: DENTAL SERVICES**

SECTION 16.5: EPSDT- COVERED SERVICES PAGE(S) 55

indicating that a restorative and/or surgical service was previously reimbursed for the same date of service as the behavior management, the payment for behavior management will be denied.

Documentation of the circumstances requiring behavior management as well as the specific efforts or techniques utilized must be recorded in the beneficiary's treatment record for each treatment visit.

A maximum of four behavior management services, per beneficiary, are available annually by the same billing provider or another Medicaid provider located in the same office as the billing provider.

D9944 Occlusal Guard – hard appliance, full arch D9945 Occlusal Guard – soft appliance, full arch Occlusal Guard – hard appliance, partial arch

An Occlusal Guard is a removable dental appliance that is designed to minimize the effects of bruxism (grinding) and other occlusal factors.

The beneficiary must have an occlusion that has progressed beyond the mixed dentition stage of tooth eruption.

The beneficiary's treatment record must include a completed TMJ summary form (see Appendix I). Indicate whether the condition is acute or chronic and if any other services are to be provided in addition to the requested splint.

This procedure is reimbursable for Oral Cavity Designation areas 01 and 02.

#### D9951 Occlusal Adjustment - limited

May also be referred to as equilibration; a reshaping of the occlusal surfaces of teeth to create harmonious contact relationships between the maxillary and mandibular teeth and is reported on a "per visit" basis.

The beneficiary must have an occlusion that has progressed beyond the mixed dentition stage of tooth eruption.

The beneficiary's treatment record must include a completed TMJ summary form (see Appendix I). Indicate whether the condition is acute or chronic and if any other services are to be provided.
