**CHAPTER 25: HOSPITAL SERVICES**

---

**SECTION 25.0: OVERVIEW****PAGE(S) 1**

---

**OVERVIEW**

This chapter applies to services provided to eligible Medicaid recipients in an inpatient and/or outpatient hospital setting unless otherwise stated. Hospital providers are to ensure that the services provided to Medicaid recipients are medically necessary, appropriate and within the scope of current medical practice and Medicaid guidelines.

This chapter consists of several sections that will address issues such as provider requirements, pre-admission certification and length of stay, prior authorization, covered services and limitations and reimbursement.

A hospital is defined as any institution, place, building, or agency, public or private, whether for profit or not, maintaining and operating facilities, 24 hours a day, seven days a week, having 10 licensed beds or more. The hospital must be properly staffed and equipped for the diagnosis, treatment and care of persons admitted for overnight stay or longer who are suffering from illness, injury, infirmity or deformity or other physical or mental conditions for which medical, surgical and/or obstetrical services would be available and appropriate. Such hospitals must meet DHH licensing requirements.
