ROW services are provided with the goal of promoting independence through strengthening the participant's capacity for self-care, self-sufficiency, and community integration utilizing a wide array of services, supports, and residential options. Participants must be able to choose to receive services and supports from any provider in their region listed on the Freedom of Choice (FOC) listing. Direct service providers cannot offer FOC to participants.

ROW services are provided as a supplement to regular Medicaid State Plan services and natural supports and should not be viewed as a lifetime entitlement or a fixed annual allocation. The average participant expenditures for all waiver services shall not exceed the average Medicaid expenditures for Intermediate Care Facilities for Individuals with Intellectual Disabilities, (ICF/IID) services.

All ROW participants must receive a residential service (community living supports, companion care, host home, shared living, or monitored in-home caregiving) and support coordination services. Other services are to be selected based on a participant's need/want and individual budget.

Participants must receive a residential service and support coordination at least once every 30 days.

through a program funded under Section 110 of the Rehabilitation Act of 1973, and those covered under Medicaid State Plan.

- Billing for multiple vocational/habilitative services at the same time is prohibited.

NOTE: No rounding up of service units is allowed.

The state intends to strategically move from segregated employment toward individual employment with a significant increase in individual employment as a long-term goal. The general strategy for transitioning current waiver participants into integrated employment activities includes training and education (participants, family, support coordinators, providers, etc.).

The participant's planning process will be person-centered and focus on employment activities the participant wishes to pursue. This will take into account, personal interests and abilities and identify any supports that the participant may need to be successfully employed.

Reimbursement

The use of the EVV system is mandatory for all Supported Employment Services except Supported Employment transportation. The EVV system requires the electronic check in/out in the Louisiana Services Reporting System (LaSRS®) or another EVV system approved by BHSF and OCDD.

Prevocational Services

Prevocational services are prevocational activities designed to assist a participant in acquiring and maintaining basic work-related skills necessary to acquire and retain competitive employment and indicated in the POC. The overall goals of the program include regular community inclusion and development of work skills and habits to improve the employability of the participant.

Prevocational services offered should engage workers in real and simulated employment tasks to determine vocational potential. Services focus on teaching concepts and skills such as:

- Following directions;
- Attending to task;
- Task completion; and
- Problem solving, and job safety skills.

All Prevocational Services are to be reflective of the participant's Plan of Care and directed toward habilitation rather than teaching a specific job skill, with the primary focus being the

PAGE(S) 63

acquisition of employment related skills based on the participant's vocational preferences and goals.

Activities associated with prevocational services should include formal strategies for teaching the skills and the intended outcome for the participant. Personalized progress for the activities should be routinely reviewed and evaluated with revisions made as necessary.

As an Employment 1st state, the State's strategy is to facilitate participant transition from prevocational services to supported employment and/or employment in the participant's occupation of choice, including individually identifying persons receiving prevocational services and targeting them for transition to integrated employment opportunities. This is accomplished through a revised person-centered process prominently featuring the values and principles of the state's Employment 1st Initiative.

As part of this implementation, the support team must clearly identify integrated community-based vocational goals, action steps, and timelines. This is reviewed on at least a quarterly basis and revised as needed. Success is measured by the individual's transition to an integrated employment setting in addition to the state meeting National Core Indicator integrated employment targets.

Prevocational services are provided to participants who are as follows:

- Are working or will be able to work in a paid work setting; and
- Need intensive ongoing support to perform in a paid work setting.

In the event participants are compensated when performing prevocational activities, the following must be adhered to:

- Participants need intensive ongoing support to perform in a paid work setting because of their disabilities; and
- In the event participants are compensated in the prevocational services, pay must be in accordance with the United States Fair Labor Standards Act of 1985.

If participants are paid in excess of 50% of minimum wage, the provider must **conduct at a minimum**:

- Conduct six (6) month formal reviews to determine the suitability of this service rather than Supported Employment services;

CHAPTER 38: RESIDENTIAL OPTIONS WAIVER

SECTION 38.1: COVERED SERVICES**PAGE(S) 63**

- Make recommendations to transition the participant to a more appropriate vocational opportunity; and
- Provide the support coordinator with documentation of both the productivity time studies and documented reviews of current placement feasibility.

Individual goals are identified and included in the participant's Plan of Care. These goals are re-assessed at least quarterly, or more often as needed, and revised as appropriate. During the person-centered planning process, support coordinators identify various types of activities the participant enjoys participating in or would like to participate in given personal preferences and goals.

These activities are to include formal strategies for teaching the skills and the intended outcome for the participant. Personalized progress for the activities should be routinely reviewed and evaluated with revisions made as necessary and included in the participant's Plan of Care. Personalized progress should be monitored to ensure that the participant has the opportunity to participate.

Support Coordinators are required to visit the participant at the prevocational site to ensure that the participant is participating in meaningful activities, is satisfied with services, and is free from abuse/neglect and monitor and ensure that meaningful activities are occurring and that the participant is not being exploited. This is documented in the Case Management Information System.
